

 100 XP 

# Introduction

1 minute

In this module, you'll be introduced to features, tools for managing, and deploying Azure resources. You'll learn about the Azure portal (a graphic interface for managing Azure resources), command line, and scripting tools that help deploy or configure resources. You will also learn about Azure services that help you manage your on-premises and multi-cloud environment from Azure.

## Learning objectives

After completing this module, you'll be able to:

- Describe Azure portal
- Describe Azure Cloud Shell, including Azure CLI and Azure PowerShell
- Describe the purpose of Azure Arc
- Describe Azure Resource Manager (ARM) and Azure ARM templates

---

## Next unit: Describe tools for interacting with Azure
